Telangana, India

Career Objective

Computer Science undergraduate with strong foundations in Python, Java, Web Development, and Machine Learning. Passionate about software development and problem-solving with hands-on experience in hackathons and real-world projects including monument and pothole detection systems.

Education

Bachelor of Technology in Computer Science Aug 2023–Present
Sridevi Women's Engineering College, Telangana
CGPA: 8.6/10 (Till 5th Semester)

Skills

- **Programming:** Python, Java, C
- **Web:** HTML, CSS, JavaScript
- **Backend:** Node.js
- **Database:** MySQL
- **Data Analytics & Visualization:** Power BI,MS Office
- **Tools:** Git,Github
- **Platforms:** Windows

Projects

Heritage Monument Detection System React.js, JavaScript, Python

- Developed a machine learning-based web application to identify heritage monuments from uploaded images. Built frontend using React.js and integrated Python ML model. Implemented image classification techniques for monument detection. Improved user interaction with responsive UI and real-time prediction.

Pothole Detection System React.js, Python

- Built a pothole detection system during a 36-hour hackathon to identify road damages using image processing. Developed frontend using React.js. Used Python for pothole detection logic. Collaborated in a team-based rapid development environment.

Gaming Website HTML, CSS, JavaScript

- Designed and developed a multi-game web platform using HTML, CSS, and JavaScript. Added interactive UI for multiple browser-based games. Improved responsiveness and user experience

Achievements

- Participated in a 36-hour hackathon.
- Maintained CGPA of 8.6/10.
- Active learner in programming and software development.

Certifications

- Data Structures – Infosys Springboard
- Object-Oriented Programming in Java – Infosys Springboard
- Database Management Systems – Infosys Springboard
- Generative AI – Infosys Springboard
- 36 hours hackathon participation certificate
